Logic Pro - Project 2.5 - Live Loops

Logic Pro Project 2.5: Build Piece Live Loops [5pts]

Using Live Loops, build a loops grid based on your choice of style/genre and record a track using that grid. One (1) point per line item. Each line is score “all or nothing”. No partial credit awarded.

1. In Live Loops, create a grid 5 deep x 4 wide minimum
2. Practice using the grid and re-arranging it.
 1. Using loop filters, fill your grid and organize as you feel best.
3. Record yourself using the grid for a minimum of 40 measures and/or 30 seconds.
4. In track view, obvious attempt to Mix/Balance project (no peaking/going into red)
Adjust volume, panning, etc. Activate Automation (“A”)
5. Bounce project.
