Audio Engineering & Video Editing Final Project - Exam

Description: Final Projects

An accumulation of student growth. Showcasing visual and audio recording, editing, mixing, and producing. Projects will adhere to district guidelines. Exceptions allowed with prior instructor approval.

- 1. Productions will contain mostly video footage; photos should fill the screen. Minimum:
 - 51% footage for Middle School
 - 75% footage for High School
- 2. Guest artists are allowed, however, each producer is responsible for editing, mixing & producing.
- 3. Students will utilize their Celtx to plan and guide pre and post production process. See below.
- 4. All projects need instructor approval prior to production.
- 5. Constant collaboration with studio members will ensure the project proceeds smoothly.
- 6. Projects will be 2-3 minutes minimum. Know and engage your audience.
 - 2 Minutes for Middle School / Level I
 - 3 Minutes for High School / Level II
- 7. Audio (master) tracks will be mixed and well-balanced.
- 8. Video will include title scene and post credits. AEVE Graphic will be included.
- 9. All faces / names must be approved by individuals / guardians before public posting.
- 10. Submission date will be determined based on Lyric Theatre and/or PAC availability.

Project Types:

- A. Music Video: Performance or meaningful story of an original or cover of a vocal performance.
- B. Action / Highlight Video: Showcasing a skill/craft with soundtrack or vocal song original/cover.
- C. Time Lapse Video: Showing a skill/craft at increased speed with narration, text, or song track.
- D. Dedication Video: Sentimental video to honor someone or achievement with audio track.
- E. "How To" Video: Educational video that teaches a skill/craft with narration or live instructions.
- F. Documentary: A scenic story about a subject with narration above a soft soundtrack.
- G. Skit/Play/Movie: Quality script that delivers clear story progression with performers.
- H. Animated Feature: See "G", but animated (or stop-animation) using your artistic abilities.
- I. Game Play: Highlight gaming technique and story progression. Special approval needed.
- J. Commercial: Advertisement of a business, product, service, organization, or event.

Audio Engineering & Video Editing Final Project - Exam

Pre-Production: Planning with Celtx - See Celtx Help Center & YouTube Play List

Utilize storyboards (SB) to explore your ideas. SB's outline each scenes actions and dialogue by actors / narrator. Include any onscreen text or special effects. Keep it simple. SB's convey the vision and needs for the scene. They'll guide students during production and editing process.

O Story Development: Beat Board (Sheet) or Freeform: Brainstorm & map ideas

- Film & TV Script: Traditional Script (Stageplay very similar)
 - Beat Board
 - Detailed Storyboard (Film & TV Only)

O Multi-Column AV: 3-Column Script

- Beat Board
- Storyboard & Slide Show Views

Considerations:

- Projects represent your passion Have Fun!
 Beginners Keep it simple
- Time is the enemy Start now, don't waste time
- Research & develop ideas
- Plan the production Over prepare
 - Cast actors & production team
 - Designate equipment, locations, & props
 - Make timetable for shooting / editing
 - Double check the parameters / rubric
- · Collaborate! More eyes / ears catch more issues
- Use the space! Fill the screen (Landscape)
- Quality sound: External Mics All voices heard (singing, narration, script, layers)
- · Quality camera work: Slow & steady movement utilize tripod, gimbal or stabilizer
- Consistent device and settings Resolution (1080pi/2K) & frame rate (23/30/60fps)
- Text/Graphics are easy to read Text color vs. background color
- Text & Graphics are visible long enough to be read
- Accessibility Closed captions & audio descriptions
- Be proud of your work No regrets

Rubric: 12 Points Total

- Storyboard reflects final product
- 2-3 Minute Minimum
- School Appropriate / Family Friendly
- Live Footage Ratio (51% MS; 75% HS)
- Audio Balance (per all audio labs)
- Title Scene & Post Credits (easy to read)
- Progression of Story / Scene
- Transitions (non-disruptive)
- Accessibility Friendly (closed captions & audio descriptions)
- Fill Screen (black bars)
- Visual relates to audio (commonality)
- Advanced Editing: Ex Split Screen, Layered Scenes, Key-Framing, Color Enhancements, Custom Text / Graphics, Speed Adjustments, etc.
